

## The Global Water Cycle

Name: \_\_\_\_\_

Date: \_\_\_\_\_ Score: \_\_\_\_\_

Part 1: Water is stored in 5 places on Earth. Name each place and note the phase that water is in (i.e., liquid, solid, or gas).

Rivers and streams

Glaciers

Runoff

Groundwater

Condensation

Transpiration

Sublimation

Evaporation

Oceans

Atmosphere

Precipitation

Infiltration

	Place	Phase
1		
2		
3		
4		
5		

There are 7 processes involved in the water cycle. Name and define each process. Include the phase change that water goes through during each process.

	Process	Definition	Water Phase	Place
1				
2				
3				
4				
5				
6				
7				
8				

Part 2: Identify the locations where water is found on Earth and the transfer process for how water moves in the water cycle.
